Dharwad, Karnataka, India

Summary

Computer Science student with a strong interest in Artificial Intelligence and Machine Learning currently building foundational skills in Python and ML Seeking an opportunity to apply structured problem solving skills while further developing my knowledge in Generative AI and prompt design. Eager to learn, grow and contribute to impactful AI driven solutions in technical environment.

Internship

Java Full Stack Developer Virtual Internship – EduSkills Academy

Oct 2025 – Dec 2025

- Learned Java full stack development through hands on projects and practical assignments.
- Worked with Java, SQL, and web application development fundamentals.
- Gained experience in backend development and database integration.

Projects

Skill Track – Internship & Skill Management System

2026

- Developed a web-based internship and skill management system for Students, Faculty, and the Placement Cell.
- Implemented user login with role based access and dedicated dashboards for different user types.
- Built modules to manage student profiles, skills, internship records, and placement eligibility.
- Developed the backend using Express.js and managed application data with MongoDB and Mongoose.

Perceptiq AI – Explainable AI Visibility & Recommendation Intelligence Platform for Businesses

2026

- Developed a full-stack AI visibility analysis platform for evaluating business readiness in AI-driven search and recommendation systems.
- Implemented deterministic scoring, evidence validation, and explainable AI pipelines using publicly accessible business information.
- Built modular intelligence engines for knowledge extraction, business perception, trust analysis, recommendation readiness, and decision support.
- Designed responsive dashboards and executive reports with React, TypeScript, and Express following scalable software architecture principles.

Education

KLS Vishwanathrao Deshpande Institute Of Technology

2023 – 2027

BE in Computer Science and Engineering (AI&ML)

8.8 CGPA

Technical Skills

- **Programming Languages:** Python, SQL
- **Backend and Frontend:** Node.js, API Integration, HTML, CSS
- **Tools:** Git, GitHub, VS Code
